

Year 5 Home Learning – week beginning 27th April 2020

Please find below a list of activities that we would like you to complete this week. Please do not try to do all of these activities in one day; spread them out over the week so that you are doing some school related work throughout each day as if you were in school. Try to work between the hours of 9am and 3pm.

If you are unsure about an aspect of the work set, please message your teacher on Class Dojo.

The BBC are still running their Bitesize daily lessons. You can access these [online](#) or through the red button service on your television.

There is also the [Oak Nation Academy](#). This is a virtual school that provides online resources and lessons. It might be useful.

Religious Education: This week marks the start of Ramadan, the most important time of the year for Muslims. Please look at the two documents, one is a presentation that explains the importance of Ramadan and Eid to Muslims and the other is a quiz where you can match up vocabulary to the definition. If you complete this, can you identify five similarities between Islam and Christianity?

Numeracy: This week we will continue looking at decimals.

Access the MyMaths from these links.

[Decimal number line work](#)

[Decimal place value lesson](#)

[Decimal place value work](#)

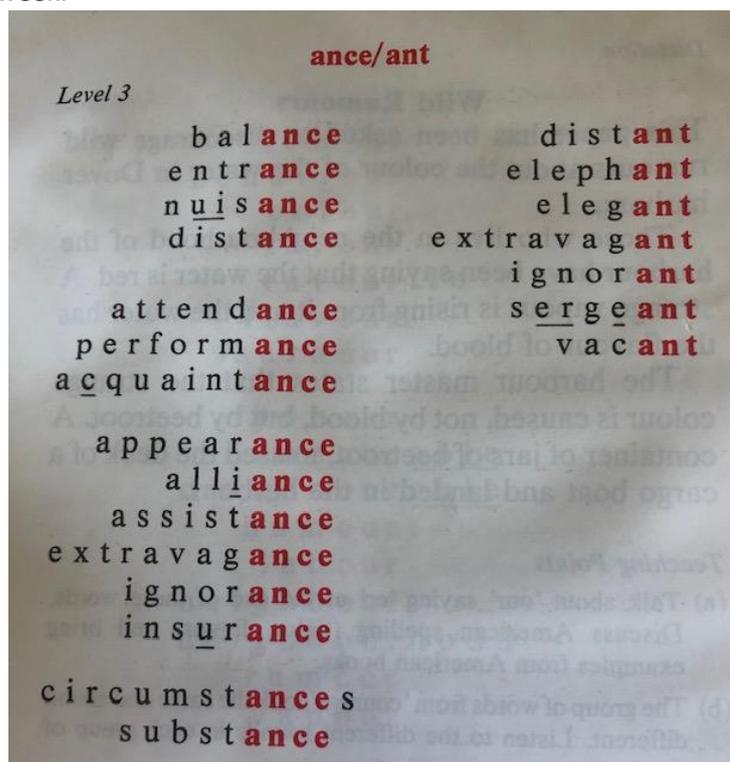

[Ordering decimals lesson](#)

[Ordering decimals work](#)

Try and go on [TimesTables Rockstars](#) as often as possible, we will be setting battles for you every day!

Literacy: Please see the separate document for your English work this week.

Here are your spellings for this week:

Topic: Our new topic this half term is Anglo Saxon Britain. [BBC Bitesize](#) and [Homework Help](#) are useful sites. The Anglo Saxons worshipped many gods. If you have ever watched the Avengers you might recognise a few of them!

We would like you to [choose one Anglo Saxon god](#), draw them and write a few lines about them. If you finish that, do you know how their religious beliefs changed over time?

Science: Our topic is 'living things and their habitats'.

Many animals experience something called 'metamorphosis'.

This week we would like you to find out what metamorphosis is and find three examples of animals that experience it. When you find your examples, please draw a diagram and explain what happens to the animal.

Physical Education: [The Daily Mile](#) have produced a great site full of fun things to do to help you stay active.

ICT/PSHE: Look at the PowerPoint on your Class Dojo page. This will show how to identify 'fake news', a really important skill.

[This is a great](#) E-Safety activity pack to do with your families.

Art: Can you create your own Islamic geometric artwork? [This](#) is a really fun way to create one online. If you want to draw one by hand, [The Met Museum](#) have created a detailed information booklet with lots of different ways to create your artwork. We look forward to seeing them!
