

Year 4

Home learning week beginning: 8/6/20

From Monday, we will be in school with Year 6. We still want to hear from you though, so please continue to send your work and any messages via Class Dojo. We may not be able to comment on all of your work or post it as often. Even though it will not be as frequent as it has been, we will still be checking in and responding to you on the Dojo at a couple of points throughout the day.

Please find below a list of activities that we would like you to complete this week. Please do not try to do all of these activities in one day; spread them out over the week so that you are doing some school related work throughout each day as if you were in school. Try to work between the hours of 9am and 3pm.

Please continue to use Class Dojo to keep in touch. We will be checking this daily to see what you're up to and be available if you have any questions or need help.

Some of you are sending lots of messages and pictures – thank you for this. Please share if you can – it is lovely for everyone to see what you have been up to and it is a lovely way to stay in touch.

RE

Pentecost was on the 31st May this year. Pentecost happens 50 days after Easter Sunday (including Pentecost itself). It is the when the Holy Spirit came down to Jesus' disciples as a rushing wind and is described as tongues of fire that landed on each disciple's head. When they emerged from the house they were in, they began speaking in tongues and spreading the word of Jesus Christ.

Task: we would like you to create a piece of artwork about Pentecost. You can use any materials to create your artwork; collage, paint, pastels. You choose! There are many beautiful artworks you can view online depicting Pentecost. Check out the ones we did in school on the school story on Class Dojo! Here are a few examples:

Maths lessons

Place value – Roman Numerals

<https://app.mymaths.co.uk/1723-lesson/roman-numerals> Please complete this lesson on Roman Numerals. You may want to write down some of the key numerals such as: V, X, L that you can refer to the rest of the week.

On the website there are two documents for Roman Numerals to complete over three days. The first is a Roman numerals booklet to work through which is based on identifying the numerals and using them on a clock. The second is a set of challenges based on Roman Numerals to help embed the numerals.

You must remember this Roman Numerals song! <https://www.youtube.com/watch?v=z1UmAgekzbs>

Remember, please do what you can and if you don't have access to a printer this can all still be written on a piece of paper!

For some challenges have a look at: <https://nrich.maths.org/9414>

TT Rock stars <https://ttrockstars.com/> 30 minutes-a-day or <https://www.topmarks.co.uk/maths-games/hit-the-button> to practise times tables

Maths frame has some great games too: <https://mathsframe.co.uk/en/resources/category/22/most-popular>

Literacy

Creative Writing Bingo

Over the next couple of weeks we would like you to continue to work through these activities – it is your choice which ones you do but the aim is to have completed a row or even the whole card! Remember to apply your best writing skills, non-negotiables and plan, edit and redraft your work to produce the best writing you can! Good luck 😊

Topic: The Ancient Greeks

In preparation for next week's English, we would like you to read and explore a range of Greek myths.

You can read/listen to many at:

<http://myths.e2bn.org/mythsandlegends/>

Science

This half term our science topic is States of Matter.

<https://www.bbc.co.uk/bitesize/topics/zkgg87h/articles/z9ck9qt> Please watch this video and read the article about how states can change by changing the temperature e.g. melting and freezing. Water is a liquid that can change state easily and quickly. When water is frozen it becomes a solid - ice and when it is heated it becomes a gas - water vapour.

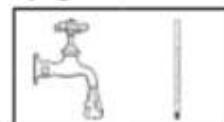

This week we would like you to do an investigation! You will investigate how long it takes for chocolate to melt in different water temperatures. You need three varying temperatures but all above room temperature. The water can be put into foil trays or bowls. **Please do this with an adult as you will be using hot water.**

Use this frame to plan your investigation.

I will make sure each piece of chocolate is the same/a different size. I will use the same/different amounts of water in each tray. The temperatures of the water in each tray should be the same/different.

What will you measure and observe in this investigation? Use the pictures to help you.

I will measure the...

I will measure the...

I will observe the...

What do you predict will happen? Which temperature of water will melt the chocolate fastest?

Art/D&T/Creativity

This week we would like you to have a go at making some Greek food – one of our favourites – Tzatziki!

Here is a very simple recipe to follow – there may be other dishes you would like to try too but this is just one that we thought would be simple and fun for you to make. Send us photos of your creations on Dojo to inspire others to have a go too!

Ingredients

350g/12oz Greek-style **yoghurt**

1 **cucumber**

2 tbsp **lemon juice** (or white wine vinegar)

2 **garlic** cloves, grated finely

dash of extra virgin **olive oil**

paprika, for sprinkling

Method

1. The best result is achieved by peeling and de-seeding the cucumber before grating. Hang the grated cucumber in muslin cloth or a tea towel in order to squeeze out all the excess liquid, if you like. Or you can simply grate the cucumber into a sieve and leave overnight to get rid of the excess liquid.
2. Combine the yoghurt, cucumber, lemon juice and garlic. Add a dash of olive oil and sprinkle with paprika.
